Headcount Enrollment Data

#	Question	Answer
6.	Total unduplicated headcount enrollment:	2017-18: 37,925 2018-19: 36,242 2019-20: 34,010
6a.	Percent Change 2017-18 to 2018-19: (calculated) Percent Change 2018-19 to 2019-20: (calculated)	-4% -6%

6. Additional Instructions and Data Definitions:

For the purposes of this report, unduplicated headcount is defined as the total number of students (credit and non-credit) enrolled at the end of the general enrollment period (also referred to as first census date). The academic year should include leading summer, fall, winter, and spring terms. If your institution calculates the academic year differently for the purposes of monitoring annual enrollment, you may respond using your local calculation and describe your method in Question 20.

7.	Total unduplicated headcount enrollment in degree applicable credit courses:	2017-18: 29,376 2018-19: 27,921 2019-20: 26,256
----	--	--

7a.	Please list any individual program which has experienced a 50% increase or decrease in the last year. N/A	
-----	---	--

7. Additional Instructions and Data Definitions:

Per federal regulations, ACCJC is responsible for monitoring for significant program growth (or decline) that may

potentially impact an institution's ability to meet Accreditation Standards. ACCJC does not determine what constitutes a program for colleges. For the purposes of this report, you may define degree-applicable credit programs as appropriate for the context of your institution's unique mission.

Distance Education and Correspondence Education

#	Question	Answer						
8.	Total unduplicated headcount enrollment in distance education in last three years:	<table> <tr> <td>2017-18</td> <td>10,881</td> </tr> <tr> <td>2018-19</td> <td>11,393</td> </tr> <tr> <td>2019-20</td> <td>11,467</td> </tr> </table>	2017-18	10,881	2018-19	11,393	2019-20	11,467
2017-18	10,881							
2018-19	11,393							
2019-20	11,467

	5%							
	1%							
<p>8. Additional Instructions and Data Definitions: Distance education is defined as education that uses technology to deliver instruction to students who are separated from the instructor(s) and to support regular and substantive interaction between the students and the instructor, either synchronously or asynchronously. For the purposes of this report, include only those courses that are 100% online in your calculation of unduplicated headcount enrollment for distance education. Do not include hybrid courses or courses in which all the class hours are face to face, but some material is posted online.</p> <p>IMPORTANT NOTE REGARDING DATA FROM SPRING 2020: When calculating total DE enrollment for 2019-20, please include 100% online courses from summer 2019, fall 2019, and winter 2020. For Spring 2020, please include only courses that were originally scheduled as 100% online. Omit any courses that shifted to a distance modality due solely to the COVID-19 pandemic.</p>								
9.	Do you offer Correspondence Education?	No						
<p>9. Additional Instructions and Data Definitions: Correspondence education is defined as education in which (1) the institution provides instructional materials (and examinations on these materials), by mail or electronic transmission (including transmission via learning management system) to students who are separated from the instructor; and where (2) interaction between the instructor(s) and the student is limited, is not regular and substantive, and is primarily initiated by the student. Online courses or online portions of courses which primarily involve "paperwork" (e.g., reading textbook and other materials posted by the instructor, taking examinations, and submitting assignments) will fall within the definition of correspondence education rather than distance education. If the online portion of a class meets the definition of correspondence education, then even if the class also meets on site, it will be considered a correspondence education course for Title IV qualification purposes. Correspondence education is not considered distance education within the U.S. Department of Education definition (see question 8, above).</p>

19. Additional Instructions and Data Definitions:

For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2019-20 job placement rate will be the number of students who completed the program in 2018-19.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2018-19, you do not need to report a job placement rate for 2019-20. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 20.

Other Information

20.

Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).

In previous years, SRJC annually changed its institution-set standards to represent moderate increases over accomplishments from the previous year. As a result, SRJC had institution-set standards that fluctuated in the categories of certificates, associate degrees, and student transfers. After careful review, SRJC determined that fluctuations in institution-set standards represented more of an aspirational goal than an institutional minimum standard.

The 2020-21 Annual Report presents new institution-set standards for certificates, associate degrees, and student transfers. The new institution-set standards represent our minimum expectation for certificates, associate degrees, and student transfers. Additionally, SRJC has established aspirational goals that represent the college's goal to continually increase successful student outcomes.

One area of note, the institution-set standard for certificates represents a 6-year historical trend

which excludes outliers. Over the past two years, SRJC has experienced a significant increase in the number of certificates awarded to students. One suspected factor to this increase is the number of IGETC and CSU certificates earned by SRJC students. SRJC plans to monitor our number of earned certificates and readjust the institutional-set standard within the next two years.

The data included in this report are certified as a complete and accurate representation of the reporting institution.
